BLACK SERIES

Mounted Air Seeders

For those of you who require a one machine solution, our mounted bin will complete the package for your compact planter bar. Gason Black Series seeders are the perfect fit for smaller operations!

Black Series Seeders are fitted with our industry leading Side Release (SR) meter system as standard ensuring unmatched functionality and user friendliness on both the 1230 and 1250 model.

Make planting hassle-free with a mounted Air Seeder attached to your planter bar. Combine with a Gason NT Series for the most compact and transportable planting setup.

Trusted by Serafin machinery in combination with their small disc seeders, this long established relationship has blossomed due to the ease of operation, flexibility of controllers and, reliability of Gason Black Series Seeders.
