BLUE SERIES

Medium Sized Broadacre Air Seeders

Designed and manufactured in Australia, **Gason Blue Series Air Seeders** are engineered for exceptional accuracy and reliability in every sowing operation. Built by our expert team, Gason high-performance Seeders ensure consistent, uniform seed placement with minimal wastage, offering farmers and growers the confidence of a perfect sowing result, every time.

Whether you're working with a wide range of seeds or facing varying field conditions, Gason Blue Series Air Seeders deliver unparalleled precision thus reducing the risks of uneven germination. Known for robust construction and dependability, these Seeders are an essential tool for those seeking optimal crop yield and long-term value in a medium sized Air Cart.

SMALL SEED MANAGEMENT

Maximise the potential of your pastures with our **Small Seed Pasture Planter** - Our Small Seed 380L or 600L Pasture Planter is the perfect solution for farmers looking to sow tiny seeds. This specialised planter ensures even distribution of small seeds, making it ideal for Canola, Rye Grass, pasture planting, cover crops, and other delicate sowing applications.

OTHER OPTIONS

- Air Warmer Kit
- Internal Bin Lights
- JD Dry Rate, SmartAg or TopCon ISOBUS Monitors
- Options for 2 or 3 main bins plus Small Seeds pasture planter
- Front or Rear Tow
- 2m or 3m Centres
- Load/Unload Augers
- Rear Hitch (*RT models only*)
- Dual Access Ladder (*1890 only*)
- Additional Remotes (*FT Models only*)

Blue Series Specifications

Model	Front Wheel Type	Bin Capacity	Tow Type	Bin Split	Front Wheel Centres	Rear Wheel Centres	Meterbox
1760	Trailed	6200L (2 bin)	RT	2 bin 44/56	N/A	2m or 3m	SR
1860	CTC & CTS	6200L (2bin) 6490L (3Bin)	FT & RT	2 bin 44/56 3 bin 43/28/29	2m or 3m*	2m or 3m*	SR
1890	CTC & CTS	9200L (2 bin) 9260L (3 bin)	FT & RT	2 bin 44/56 3 bin 44/25.5/30.5	2m or 3m*	2m or 3m*	SR

CTC - Controlled Traffic Casting CTS- Controlled Traffic Steering
*Please contact dealer for model configurations

- SR Meterbox, SmartAG monitor and external work lights come standard with most Blue Series medium broadacre Air Seeders.
- 7" loading/unloading auger optional for 1750 model.
- 8" loading/unloading auger optional for 1760, 1860 & 1890 models.

ACCURACY

Gason's proven range of air seeders are robustly engineered, highly accurate and extremely easy to use. This doesn't occur by chance. Complex interrelationships between metering and distribution systems, and bin and blower design are at work. Through countless hours of in-house and field testing, Gason have developed a deep understanding of these complexities. The result is a range of air seeders with an enviable reputation for accuracy, durability, and reliability season after season.

VRT METERING SYSTEM

Metering accuracy is assured with Variable Rate Technology (VRT), featuring ease of calibration and application rate changes from the tractor cabin. VRT's advantages include on-the-go application rate changes, prescription farming practices (GPS mapping technologies), high torque hydraulic motor with low oil requirements, and failsafe override system.

SIDE RELEASE ACCESSIBILITY

Side Release (SR) metering system, provides a quantum leap in meter box functionality, catering for a wide range of seeding practices. Cleaning and changeover becomes an extremely fast and simple process. SR is standard equipment on 6,000L and above models.
