PASTURE TOPPER

Pasture Innovation Equipment

Growing sound pastures is an important requirement for professional farm and stud managers across the nation. Dairy farmers are aware that increased milk production is achieved by a regular pattern of grazing, topping and irrigation. Horse studs, sheep and beef cattle operations can all benefit from pasture topping.

Originating in 1989 as the Chris Grow 'Proper Topper', both the Gason 3PL and Trailed Pasture Toppers are designed to help you achieve a better outcome on your farm. These field proven range of Toppers are specifically tailored to livestock farmers - purposely designed for sharp clean cutting of pasture without windrowing, eliminating wheel marks with discharge cuttings spread evenly behind.

Grazing farmers love Gason Pasture Toppers, with their 6mm steel deck, 8mm easy height adjustable side plates, with wide hardened steel skids formulated to reduce grass drag and allow even wear. 3PL models are Cat 2/3 Quick Hitch ready so implement changeover is streamlined from the cab. Trailed models have hydraulic level lift on spring suspension.

Pasture Topper Technical Specifications		
Models	Variations	Cutting Width
8FT	3 Point Linkage (Cat2/3)	2.4 metres
10FT	3 Point Linkage (Cat2/3)	3.0 metres
10FT	Trailed	3.0 metres
12FT	Trailed	3.6 metres
Standard Features		
Deck Materials	Angular streamline 6mm deck with underside reinforced	
Gearbox	Bare-Co 130HP	
Clutch	4 plate clutch with torsion rubber couplings	
Skids	Hardened spring steel	
Side Plates	Easy adjust 'lock & dog'	
Safety Shields	Hydraulically operated hinged rear debris shields	
Safety Chains	Front mounted debris chains	
Options		
Dual Mulching Blades	For a finer cut and better spread	
Additional Information		
<ul style="list-style-type: none"> • Suitable for 90-130HP tractors, subject to tractor specifications • PTO 540rpm & 1000rpm (model dependent)
