## Heavy Duty Single Rotor Slashers

Gason Very Heavy Duty (VHD) Slashers have a reputation amongst contractors and councils for being tough and reliable - handling the most demanding slashing conditions. Our VHD Slashers are set apart by premium components and enduring build quality, with Comer Italian gearboxes as standard. Whatever your application, there will be a Gason slasher to suit your needs!

Highly maneuverable Taper Back models offer Centre & 300mm offset left 3PL mount option, providing versatility to cover the most demanding slashing tasks. Optional choice of tight turn wheel kit or

domed end rear roller together with controlled floatation from the lock or float flip top link gives a working range of 5 degrees down & 47 degrees up to prevent PTO damage.

With Quick Hitch frame suitability, Gason's 7 & 8 FT square back slashers couple easily, with today's 150+HP tractors.

The bull-nosed square back gives the operator a sturdy push bar which helps when clearing dense shrub and bushland.

Single Rotor Slasher Specifications
