CLASSIC SPREADER

Durable, Reliable & Built to Last

Gason Spreaders are simple to operate and are highly efficient. Manufactured from heavy gauge steel and coated with two pack paint for superior corrosion protection, they will give you years of reliable service.

Our classic 7T spreader will spread urea to 24 metres and heavy pelletised fertilisers up to 30 metres. Its feed chain speed is controlled by a 3 speed fully sealed Australian built gearbox/jockey wheel drive system running on the spreader's tyres. Fine application rate adjustment is made by changing the rear discharge door height. Spinners are operated hydraulically and hungry boards are fitted as standard on 7T the model.

- Spinner speed can be controlled either at the spreader or tractor.
- Spinner speed is displayed on the spreader mounted tachometer.
- No external connections are required.

If you're looking for a tough and dependable spreader for fertiliser or manure, a Gason Classic is the ideal machine.

Classic Spreader Specifications			
Dimensions (mm)	3T	7T	
Overall width	2295	2500	
Bin width	1846	2355	
Overall height*	1725	2630	
Side of bin height*	1590	2485	
Overall length	4745	5500	
Bin length	2400	3000	
Wheel centres	2000	2000	
Front step height	N/A	565	
Ground clearance	365	460	
Spinner height to ground	365	690	

**Heights measured with 450mm under front hitch and no tarp kit or load cell options. Add 150mm to overall height if load cells kit is fitted to 7T Spreaders.*

3 TONNE

The classic Gason 3 tonne spreaders are ideal for small plots and operations which reside on undulating countryside. This low profile spreader can manoeuvre easily through tight areas such as orchards.

7 TONNE

Packed with standard features and optional extras. The 7 tonne spreader is a versatile general purpose machine, ideal for spreading a variety of products from gypsum, lime, chicken manure and granular product.

7 TONNE OPTIONS & EXTRAS:

- **Tarp Kit** with long handle for ease of use. (also available for 3T)
- **Calibration Kit** to determine accuracy of pelletised products.
- **Load Cell Kit** calculate your application rate accurately.
- **Heavy Duty Spinners** for heavy materials. (also available for 3T)
- **Independent Feed Chain / Spinner Hydraulic Kit.**
- **Tail Light Kit**
