

PLATINUM SERIES

Broadacre Air Seeders

GASON[®]

GASON Platinum Series

Reduce your downtime and maximise your efficiency with the Gason Platinum Series Air Seeders. Our high capacity 2120, 2150, 2170 & 2210 models ensure the only time you stop operation is for lunch!

Platinum Series Specifications							
Model	Front Wheel Type	Bin Capacity	Tow Type	Bin Split	Front Wheel Centres	Rear Wheel Centres	Meterbox
2120	CTS	12,400L (2 bin)	FT & RT	44/56	3m	3.24m (std)	SR
		12,600L (3 bin)		44/25/31		3.1m (opt)	
2150	CTS	15,150L (2 bin)	FT & RT	44/56	3m	3.39m (std)	SR
		15,300L (3 bin)		44/25/31		3.1m (opt)	
2170	CTS	17,250 (3 bin)	FT & RT	32/41/27	3m	3.39m (std)	SR
						3.1m (opt)	
2210	CTS	21,370L (3 bin)	FT & RT	32/41/27	3m	3.39m	SR

CTS – Controlled Traffic Steering

SmartAG monitor and internal/external work lights come standard with all Platinum Series high capacity Air Seeders.

9" loading/unloading auger optional for 2120/2150 models.

11" loading/unloading auger optional for 2170/2210 models.

OTHER OPTIONS

- Small Seed Pasture Planter
- Load Cells on all bins
- Air Warmer Kit
- JD DRC, Topcon ISOBUS or Trimble Monitors
- Extra Head Blockage Sensors
- Sowing Kit
- Rear Hitch (for RT models)
- Extra remotes (for FT models)

Accuracy

Gason's proven range of air seeders are robustly engineered, highly accurate and extremely easy to use. This doesn't occur by chance. Complex interrelationships between metering and distribution systems, and bin and blower design are at work. Through countless hours of in-house and field testing, Gason have developed a deep understanding of these complexities. The result is a range of air seeders with an enviable reputation for trouble-free service year after year.

VRT Metering System

Metering accuracy is assured with Variable Rate Technology (VRT), featuring ease of calibration and application rate changes from the tractor cabin. VRT's advantages include on the go application rate changes, prescription farming practices (GPS mapping technologies), high torque hydraulic motor with low oil requirements, and failsafe override system.

Side release accessibility

Side Release (SR) metering system, provides a quantum leap in meter box functionality, catering for a wide range of seeding practices. Cleaning and changeover becomes an extremely fast and simple process. SR is standard equipment on Gason Platinum Series models.

Load Cell Option

The Platinum Series seeders have a load cell option that can be fitted to the main bins, as well as small seed bin. Keeping an eye on material bin weights has never been easier.

PROUDLY DESIGNED & CRAFTED
