CAUTION MOVING PARTS

CLASSIC SPREADER

Durable, Reliable & Built to Last

GASON[®]

GASON Classic Series

Gason Spreaders are simple to operate and are highly efficient. Manufactured from heavy gauge steel and coated with two pack paint for superior corrosion protection, they will give you years of reliable service.

Our classic 7T spreader will spread urea to 24 metres and heavy pelletised fertilisers up to 30 metres. Its feed chain speed is controlled by a 3 speed fully sealed Australian built gearbox/jockey wheel drive system running on the spreader's tyres. Fine application rate adjustment is made by changing the rear discharge door height. Spinners are operated hydraulically and hungry boards are fitted as standard on 7T the model.

- Spinner speed can be controlled either at the spreader or tractor.
- Spinner speed is displayed on the spreader mounted tachometer.
- No external connections are required.

If you're looking for a tough and dependable spreader for fertiliser or manure, a Gason Classic is the ideal machine.

3 Tonne

The classic Gason 3 tonne spreaders are ideal for small plots and operations which reside on undulating countryside. This low profile spreader can manoeuvre easily through tight areas such as orchards.

7 Tonne

Packed with standard features and optional extras. The 7 tonne spreader is a versatile general purpose machine, ideal for spreading a variety of products from gypsum, lime, chicken manure and granular product.

7 Tonne Options & Extras:

- **Tarp Kit** with long handle for ease of use. (also available for 3T)
- **Calibration Kit** to determine accuracy of pelletised products.
- **Load Cell Kit** calculate your application rate accurately.
- **Heavy Duty Spinners** for heavy materials. (also available for 3T)
- **Independent Feed Chain / Spinner Hydraulic Kit.**
- **Tail Light Kit**

Classic Spreader Specifications

Dimensions (mm)	3T	7T
