# CLASSIC SERIES

3T & 7T

Simple to operate and highly efficient.  
If you're looking for a tough and dependable spreader, a  
Gason Classic is the ideal machine.

The 3T & 7T spreaders will spread urea to 24m and heavy  
pelletized fertilisers up to 30m.

Its feed chain speed is controlled by a 3 speed fully  
sealed Australian built gearbox, and jockey wheel drive  
system running on the spreader's wheel.

# PREMIUM SERIES

12T

The 12T broadacre spreader comes in the largest size for maximum spread-ability.

**Spread to 36 metres!**

Variable Rate Technology (VRT) provides application control from the tractor cabin, reducing downtime and increasing efficiencies.

# SPECIFICATIONS

## PREMIUM SERIES

12T		
Capacity		12 tonne
Volume		10,690L
Chain width		730mm
Spinner diameter		890mm
Max hydraulic flow (VRT)		110L/min
Unloaded weight		3,000kg
Max loaded weight		15,830kg

## CLASSIC SERIES

7T		
Capacity		7 tonne
Volume		7,900L
Chain width		730mm
Spinner diameter		675mm
Max hydraulic flow		57L/min
Unloaded weight		1,700kg
Max loaded weight		8,900kg

3T		
Capacity		3 tonne
Volume		2,720L
Chain width		500mm
Spinner diameter		575mm
Max hydraulic flow		50L/min
Unloaded weight		1,250kg
Max loaded weight		4,510kg

# OPTIONS & FEATURES

## PREMIUM & CLASSIC SERIES

### TARP KIT

Tarp covering to protect your product from weathering, featuring a long handle for ease of use.

### CALIBRATION KIT

Determine the accuracy of your pelletised products with our calibration kit - consisting of two collection trays, sample bag, digital scales and carry frame. Available for the 7T & 12T spreaders.

### HEAVY DUTY SPINNERS

Spread contaminated materials such as manure with our heavy duty spinner discs. Changing products is as simple as changing between Gason's general purpose discs (supplied standard) and heavy duty discs (sold separately). Available on all spreader models.

### INDEPENDENT FEED CHAIN & HYDRAULIC SPINNERS

This setup allows you to operate the gearbox independently of the spinners. When turning on your headland you can disengage the gearbox to stop material flow while leaving the spinners operating. Available on 7T and 12T Ground Drive spreaders.

### TAIL LIGHT KIT

Make your spreader road legal by fitting a tail light kit, with or without a hazard beacon. Please check your local regulations for clarification on transport. Available on 7T and 12T spreaders.

## PREMIUM SERIES

### WIDE SPREAD SPINNERS

Spread granular product to 36m by fitting our Gason WideSpread spinner discs to your 12T spreader. These discs come standard with all Premium spreaders.

### VARIABLE RATE TECHNOLOGY (VRT)

Get the most out of your Premium spreader with Gason's Variable Rate Technology. VRT hydraulic drive metering offers the versatility of variable rate application either by manual control from the tractor cab or via prescription maps.

### VRT MONITOR OPTIONS

A variety of options are available for Gason's Premium spreader range. Choose between SmartAG, Topcon and John Deere. See your Gason dealer for more information.

### WHEEL CENTRES

Customise your wheel centres with either 2m centres (standard) or 3m centres (optional). For those who require both 2m and 3m wheel centres, a Multiset Axle option is available which allows you to switch rear wheels between spacings. VRT metering is required when choosing 3m wheel centres. See your Gason dealer for more information.

### ROW CROP TYRES

A narrow Row Crop wheel assembly can be fitted to your Gason Premium spreader, in lieu of standard flotation tyres. The 480mm wide wheels provide high load carrying capacity to suit your controlled traffic practices. See your Gason dealer for more information.

### LOAD CELLS

Calculate your application rate accurately with a 12T load cell option. Either calculate material used over a known area manually, or use the SmartAG 7300 display to check the applied rate when stationary. Going to the next level, Topcon ISOBUS with Load Cell Calibration feature will allow the spreader to self-calibrate product and ensure the correct application rate is maintained even when bulk density of the product varies. Best used when spreading lime, gypsum and manure products at medium to high rates.

# From our family to yours...

After WWII and seeking new opportunities, Frank Gason, his wife Jean and their young family moved from Geelong to Ararat, Victoria and started AF Gason Pty Ltd. For over three quarters of a century since, continuous generations of the Gason family have been living and working in this Rural City, with their presence remaining strongly felt in the community to this day. Of course, as the Company grew and became one of the largest regional employers in the area, the Gason name has become recognised not only locally but also nationally and internationally.

With core values of honesty, respect and openness, the family have endeavoured to ensure that the wellbeing of their staff, their families and the community in which they live and work is paramount. Whenever practically possible, the importance of achieving a positive work/life balance is considered in the daily operations of the Company – in fact one of the business’s operational rules is to value family life within the community! From supporting local churches, schools, sport clubs and community groups through finance, advice, leadership, and participation, the Gason family have certainly settled and, are committed to this great part of country Victoria.

A family and business that have always strived to ensure the sustainability of employment through good times and bad whilst demonstrating integrity, ethical conduct, honesty and fairness in all their business dealings, the Gason family desire to provide employees with challenges,

opportunities, and personal satisfaction whilst recognising their value and contribution.

From the humble beginnings of the motor trimming business in January 1946, many members of the Gason clan have worked permanently or on a part-time basis in the business. At the time of publication, 6 members of the family, spanning 3 generations, fulfil prominent roles with the manufacturer:

- Les Gason | Chairman of the Board of Directors
- Greg Gason | Agricultural Division Manager and Director
- Wayne Gason | Managing Director
- Oakley Gason | Marketing Coordinator
- Morgan Gason | Heater Division Manager
- Riley Gason | Industrial Services Engineer

Highly capable in their own specific fields, with over 150 years of experience shared between them, the Gason family members are proud of the business’s heritage and are committed to continue conceptualising, designing, manufacturing and assembling high quality agricultural machinery tailored for the Australasian market - machinery that is producer proven and as their Father, Grandfather, and Great Grandfather Frank would say,

“Built to Last...because it’s Gason.”

# GASON®

Built to last.

*“We’ve been running the Gason gear for the last 12 years, and needed a high capacity spreader.*

*Changing product is as simple as changing the discs, and we can cover around 70 hectares per hour on average.”*

- Chris Bartlett, Pimpinio VIC
